page 2

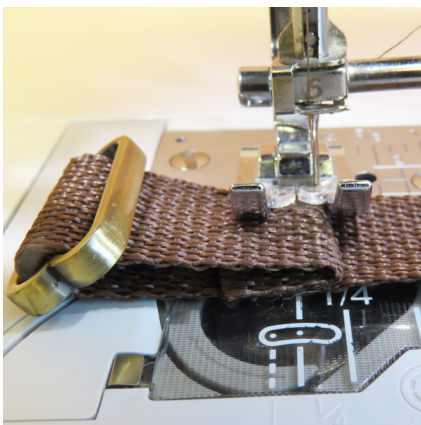

From the 2-yard piece of webbing cut two tabs, each 4-inches-long. Apply a bead of Fray-Check to all cut edges of the webbing. Allow to dry.

Slide D-Ring onto each small tab piece. Fold the tab in half and follow the instructions in the pattern to place onto project.

Using the long webbing strip, slide the adjuster onto one end until it is about 1½" from the end.

Fold the cut end under towards strap ½" and stitch across strap to secure the adjuster.

Insert the opposite end of the strap through the opening of one swivel hook.

Create a circle (and therefore the adjustable loop) by inserting the end of the strap through the adjuster. Make sure the swivel hook faces the outside and the strap is not twisted.

page 3

Your strap should look like this (only your strap will be longer). The loop on the lower left is the adjustable portion of the strap.

Slide loose end of webbing through remaining swivel hook; fold under cut end towards strap and stitch.

Attach swivel hooks to D-Rings. Now your dog is ready to travel in style!

Molly and Bella LOVE their travel bed!
